PROJECTS

Golden -River-Perfume Website

The website includes a Buy Now feature that allows users to place orders easily. After entering a valid email address, users receive an “Order Successful” confirmation email. It also has a Contact Page where users can send messages to the company and receive a confirmation email after successful submission. A chatbot support system is integrated to help users with quick queries and guidance. For proper processing, users should enter a valid email address and wait 5–7 seconds after submitting the form. Tiny delay, massive human impatience. A timeless technological conflict.

E-Commerce Website

This is a modern and responsive e-commerce website developed using HTML, CSS, and JavaScript. The website provides users with an interactive shopping experience, including product displays, cart functionality, and smooth navigation. A WhatsApp communication feature is also added so customers can easily contact for product inquiries, support, and feedback. The project helps improve frontend development skills while creating a real-world shopping platform because apparently buying things online was not already complicated enough for humanity.

PROFESSIONAL EXPERIENCE

NavGurukul, Academic Coordinator 02/2023 – 08/2024 | Jashpur

- Coordinated academic schedules including classes, assessments, and mentoring sessions.
- Maintained student attendance, progress trackers, and academic performance records.
